# HANDMADE

RONA's passion for detail extends throughout the collection. Graceful, handmade mouth-blown glass, excels in fine optics and has been designed to underline the subtlety of handmade production. Each piece is an original that carries the historical tradition of glassmaking in our territory. Gift the result of the art of Slovak glassmakers, to make yourself or others happy! Fall in love with the strength of the fragility of RONA glass, expertly crafted from the finest lead-free crystal.

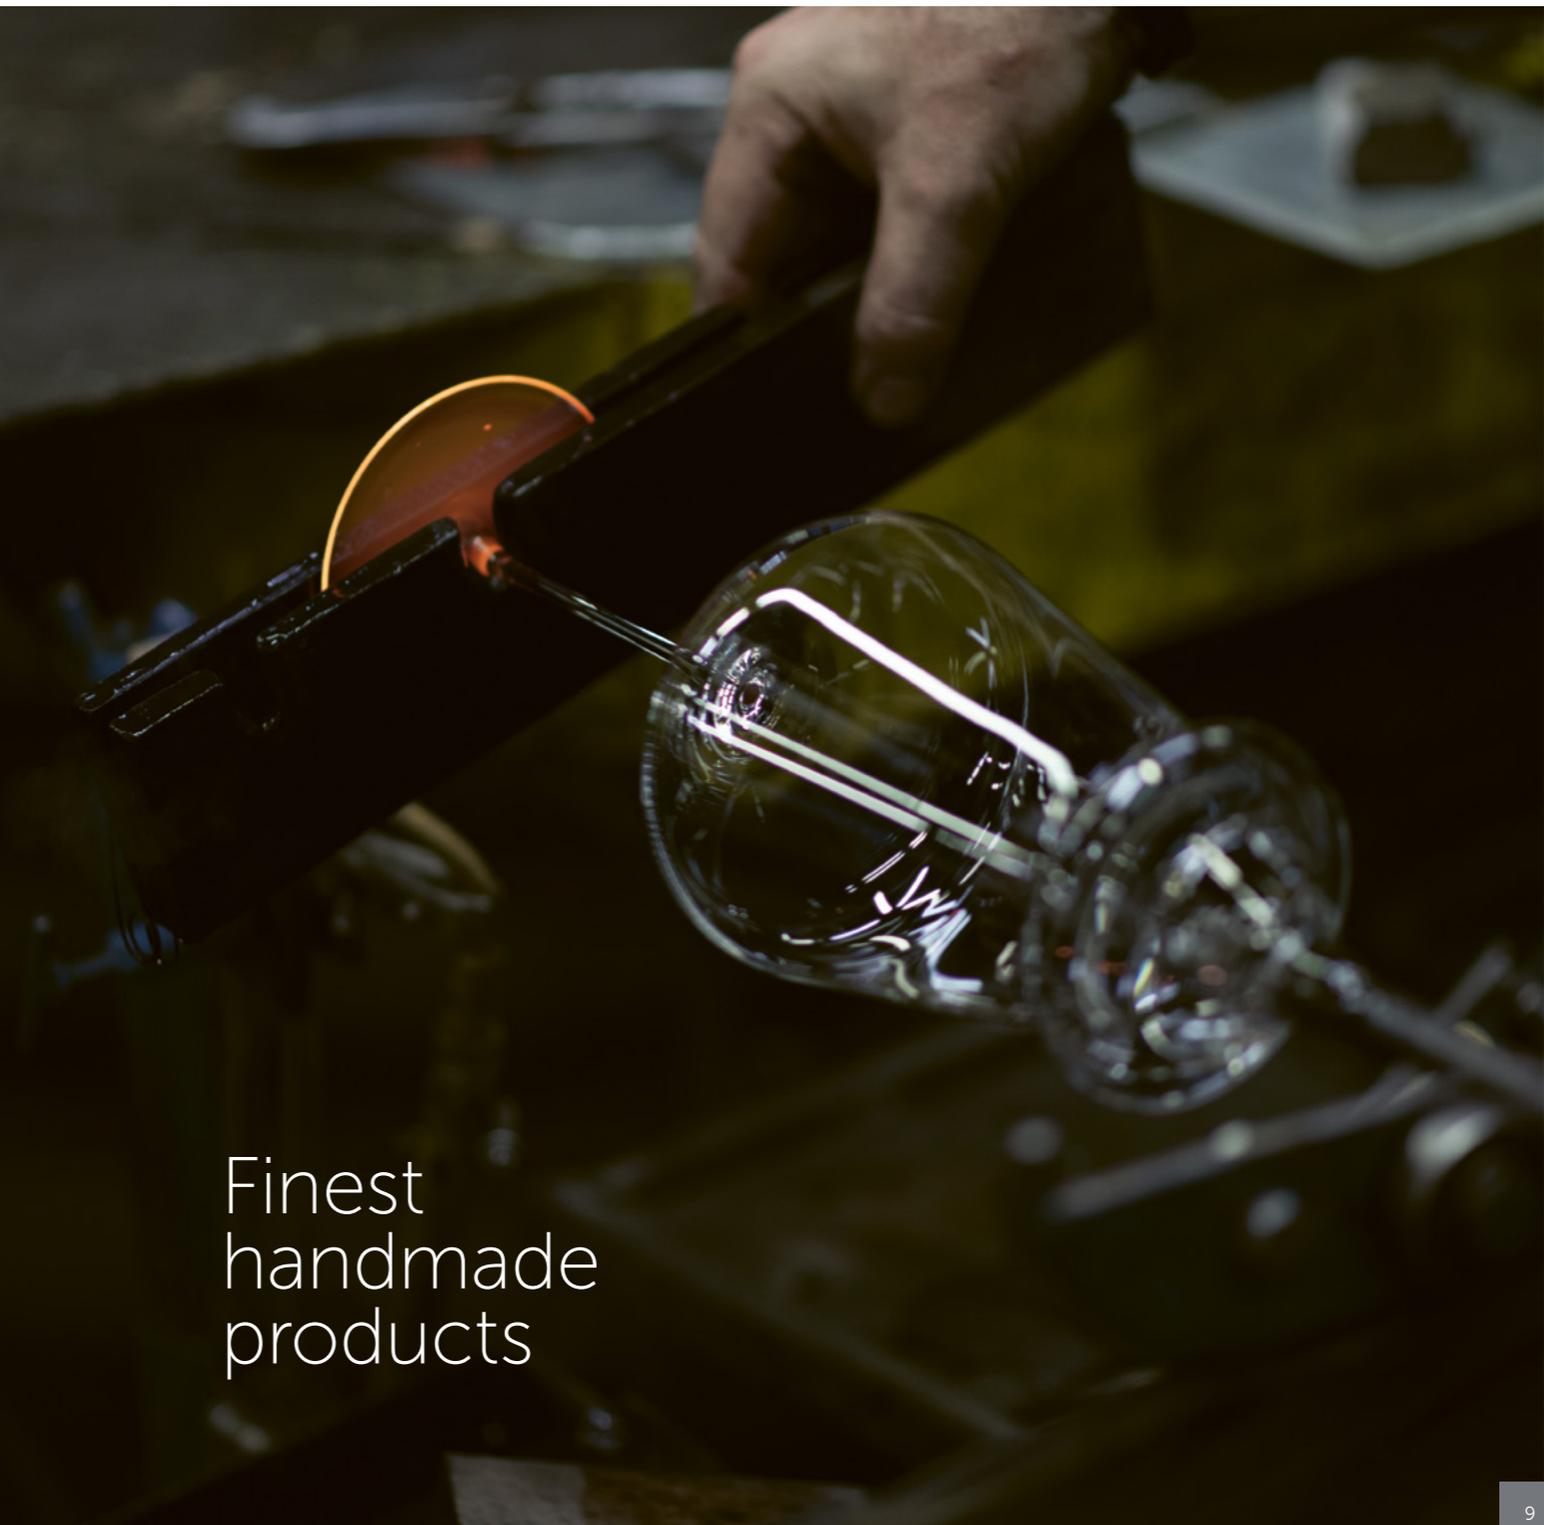

RONA PREMIUM glassware range is testimony to 130 years of expertise in manufacturing quality products. RONA PREMIUM offers high-quality glass collections for every drink, occasion or requirement. Glasses, decanters, pitcher and whiskey set – the perfect addition to the magnificent table culture. Now, ingeniously simple wineglass concept is bringing clarity in the choice of the proper wine glass.

# TRADITION

The glassworks was founded in 1892 by the entrepreneur Jozef Schreiber as the last and the largest glassworks of the Viennas company Schreiber und Neffen, which had the most modern technical equipment for its time. The glassworks in Lednické Rovne is the most succesful glassworks in Slovak history. The production range of the glassworks was very wide and diverse from the beginning. It contained historicizing, often richly decorated pieces, while in the era of Functionalism, simple elegant cups and shapes were developed, predominantly made of clear smooth glass, which were in full compliance with the principles of this minimalist style.

The glassworks is trading with a wide range of customers from all over the world and provides them with activities related to the development, production and servicing of beverage glass for households, hotels and restaurants as well as for the airlines and cruises. Machine and hand-crafted goblets and beverage glasses are covering the fundamental position in the company's product range.

# DESIGN BY

Patrik Illo is the Lead Designer and Visual Artist at RONA, a.s., he focuses on glass design, experimental design, creation of objects and installations. Since 2010 he has been the Director of the Studio of Glass at the Academy of Fine Arts and Design in Bratislava. He has won several design awards, and his works have been presented at 40 individual exhibitions and more than 100 joint exhibitions in Slovakia and abroad, as well as being published in various magazines.

# DECANTERS

RONA handmade decanters are high-class models in both form and function. The stylish decanters with precisely defined curves of the body are ideal for aeration of your wine, as they offer a wide surface area for the wine to be exposed to oxygen after decanting. These wine decanters have a slanted spout for easy pouring and a narrow neck fit to handle. Lightweight, lead-free crystal makes them the perfect decanters to hold and to pour from. Entertain your guests with RONA elegant wine decanters.

# GLASS CARE

- 1** Always clean your glasses carefully, ideally by hand. Wash your glasses thoroughly, inside and out, using hot but not boiling water. The glasses should then be rinsed with clear water. Best washing temperature for RONA glass is 60 °C / 140 °F.
- 2** Allow your glasses to air dry right side up, or hand dry them using lint-free or microfiber towels. When drying by hand hold by the bowl and rotate the cloth gently.
- 3** The glasses are dishwasher safe but we recommend using mild, unscented detergent, the lowest heat setting on the machine and glasses must be stored tightly in dishwasher.
- 4** At the end of the dishwashing cycle open the door to let the heat and steam escape, leaving the glasses to cool and dry naturally.
- 5** Our glassware products are not suitable for use in microwave ovens, and should not be used for serving hot beverages as RONA glassware is not heat-resistant.
- 6** Handle the products with care to avoid damage or injury, and do not allow children to play with glassware.

Premium

# PACKAGING

By presenting RONA glassware range in an elegant gift box, you'll be sure to make an unforgettable impression. A thoughtful and timeless keepsake gift such as this, is most definitely a winner. Securely fitting gift box will allow for a wonderful surprise upon opening, and the practical magnetic closing lid with ribbon complements the functional gift box. Gift box includes a tailored insert, making this a secure glassware gift ready-to-ship. And it goes without saying the packaging is eco-friendly, which means that it is recyclable, compostable and reusable.

# SUSTAINABILITY

We are well aware of our role and responsibility in the ecological value chain, and we strive to improve our performance continuously. For RONA, the concept of being consistently sustainable means focusing holistically on environmentally friendly processes and social working conditions. To us, sustainability is about responsibility. The integration of sustainability requirements is focused on key topics such as resources, suppliers, production, transportation, recycling. RONA special glass composition known as crystalline declared by the standard 69/493/EEC Crystal Directive guarantees it is free of lead, doesn't contain any polluting additives and toxins, using only certified raw materials. Safe for your health, children and environment.

Sustainable ecological balance is ensured through 100% recyclable process, caused by endless inclusion of used glass to our recipe for glass production. Trust a material whose history is over 5000 years in the making. Not only our products are sustainable. We are also continuously working on making our packaging as sustainable as possible. RONA PREMIUM boxes, labels, cards and catalogues are printed with compostable inks on recycled materials, giving a second life to materials that are already in circulation. We have identified the following three fundamentals which assist us in developing and improving our sustainable packaging range: compostable, recyclable, reusable.
